## INSTRUCTIONS

Before you begin, damp sponge your bisque to remove foreign contaminants, dust, and to prep your surface to receive glaze.

1. Paint 1 thick coat of #44 all over the top of the plate until no white is showing.
2. When the color has lost its shine, take a slightly damp sponge and gently wipe the color off the pottery. You want to wipe lightly, removing the color from just the raised parts of the texture. This will leave the color in just the cracks, giving it an antiqued look. For best results, continually rinse your sponge in your water bowl while you wipe, as needed, and squeeze out the water well so it doesn't drip onto your pottery.
